G3-PLC Training

Overview of G3-PLC technology

Goal

The main goal of this training is to offer a good comprehension of the main mechanisms of G3-PLC technology and its integration into a G3-PLC based system. It also covers G3-PLC security and shows some generic principles of PLC technologies.

This training duration is 1.5 days.

One training session may accept up to 10 attendees.

Training content

The training is organized in two parts:

G3-PLC Overview and theoretical basis (~2-3h)

■ Overview of G3-PLC

G3-PLC features
G3-PLC communication stack

G3-PLC communication protocol (~7-8h)

■ Overview

Layer-by-layer G3-PLC communication stack

Physical layer

Main principles

Mechanisms description

■ MAC layer

Main principles

Mechanisms description

■ Theoretical basis

PLC principle

Communication stack principle

Description of the generic communication mechanisms

■ Adaptation layer

Main principles

Mechanisms description

■ IPv6 and UDP layers

Main principles

■ G3-PLC security

Reminder regarding communication protocol security Choice and implementation in G3-PLC
