TRIALOG

About us

Trialog is an independent company founded in 1987 and historically based in Paris, France. Its clients are large Industrial European companies. The strategy of Trialog is to offer technological innovations to its customers. This offer is based on the integration of innovative technologies in industrial information systems.

Our offer

Through its training offer, Trialog helps you to handle the state-of-the-art technologies and to integrate them into your project. Our trainings are split into several modules, whose level of detail will depend on your objectives and the background of the attendees.

Expertise

- 10 years in Smart Metering
- 10 years in DLMS/COSEM
- 26 years in PLC
- Founding Member of **G3-PLC Alliance**
